Hey everyone!

After the governance committee meeting today, so we can all be prepared for next week's meeting, I think it would be great to have a community scoping exercise

for what should be in-scope and out-scope for the Secret Foundation for current protocol needs. Let's make this a constructive conversation.

I believe this will help us have an informed discussion next week about funding. It would be an added benefit to have insight from current and past Foundation members, Secret Labs, and some application layer teams.

Let's find a path forward together.
