The idea would be to propose the option for compounding (claim + restake) of the rewards of ApeCoin Staking.

Different mechanism could be implemented such as:

- If the NFT you paired are not maxed out: Auto-compounding of all rewards to complete pairing pools in priority.

- If the NFT you paired are already max out: Auto-compounding in the ApeCoin pool instead.

- In all cases: Make the single ApeCoin pool auto-compounded.

This AIP would need to define different parameters such as the Bounty to reward the user who trigger the compounding for a pool if the process is manual OR a performance fee to cover the auto-compounding integrated to the contract.

Let's discuss about the idea?

Proposals submitted to the AIP Ideas category can be vague, incomplete ideas. Topics submitted here are not required to be submitted as a formal AIP Draft Template, however, you may still use the template if you wish.
