In 2020 I staked 100 DAI through Coinbase Wallet. Txn Hash:
0x79fc72729a1972ba4cecf4661aad2ce8b5112859e9a593674c36b1fb477c5211

I cant find a way on the DYDX site to withdraw and get my funds back. I checked the DYDX Staking and Governance page but nothing shows in there when I am connected to my Coinbase Wallet. THE CB wallet shows the funds are still staked though and I have no subsequent transactions showing funds taken out.

Assistance would be appreciated
