Off-Chain Governance

Since subDAOs can arbitrarily set up their own forms of internal off-chain governance, this article will restrict itself to the off-chain governance of Maker Core. Off-chain governance is a form of governance that does not involve tokens or blockchain interaction. It allows more people to participate in improving the protocol by freely exchanging ideas and gathering feedback. This can be used to support and inform future on-chain governance.

Off-chain governance can be conducted in:

- The[MakerDAO forum](#)
- , usually under the[Ecosystem Discussion category](#)
- . The forum also allows for creation of polls to gauge community sentiment.
- The[MakerDAO Discord server](#)
- .
-

When engaging in off-chain governance, it is important to prioritize courtesy and common sense. MakerDAO encourages respectful and inclusive discussions, and constructive feedback.
