Operator precedence

Below is the table of operator precedence.

The higher an operator is in the table, the earlier it is evaluated.

Group Operators Comments Method calls, struct member access . Postfix unary ? [] Prefix unary @ * ! ~ - Bitwise <<

Not yet supported. & ^ | Arithmetic * / % * Preceded by bitwise operators starting from next major Cairo version (3).

Seediscussion . + - Comparison == != < <=

= Logical && || Assignment = += -= *= /= %=

<<=

= &= ^= |= Second line not yet supported.

7.4.6 Error propagation operator ð§ 7.5 Parenthesized expressions
