Tradao Grant Bi-Weekly Update - December 13, 2023

I. Executive Summary:

1. Roadmap Progress

2. Development of Copy-Trading Function:

We have completed the main smart contract component, which is currently undergoing an audit by Peckshield. The audit results are expected by the end of this week. Following this, we will proceed with frontend deployment and function testing, aiming to complete these steps by the end of the month. Our progress aligns with the established roadmap.

Following this, we will proceed with frontend deployment and function testing, aiming to complete these steps by the end of the month. Our progress aligns with the established roadmap.

1. Milestone/KPI Achievements

2. Pre-Launch Success:

Although the copy-trading feature is yet to be released, and hence related KPIs (transaction numbers and new GMX address acquisition) have not commenced, we have a notable achievement to share. From November 27, 2023, to the date of this report, we've attracted nearly $5M in trading volume on GMX through our referral link, without any additional trading incentives.

From November 27, 2023, to the date of this report, we've attracted nearly $5M in trading volume on GMX through our referral link, without any additional trading incentives.

1. Dune Dashboards Development

2. Custom Dashboard Page:

We are in the process of creating our dashboard page, which will be launched following the completion of the copy-trading function. This dashboard will not only feature KPI data but will also include other relevant information. Additionally, we are open to displaying necessary data on the Dune dashboard if needed.

This dashboard will not only feature KPI data but will also include other relevant information. Additionally, we are open to displaying necessary data on the Dune dashboard if needed.

II. Current Progress:

1. New Feature Implementation

2. Trader's Trading Volume Data:

We've enhanced the trader's profile by including their trading volume data. This information is now accessible on the trader's detailed profile and can also be retrieved via the tradaogmxbot command, making it easier and clearer for users and the community to view a trader's trading volume and find out which address contributed most in the trading volume.

1. Trader's Trading Volume Data:

We've enhanced the trader's profile by including their trading volume data. This information is now accessible on the trader's detailed profile and can also be retrieved via the tradaogmxbot command, making it easier and clearer for users and the community to view a trader's trading volume and find out which address contributed most in the trading volume.

1. Enhancement of Buy & Sell History Visualization

2. Improved Preference Section:

We've upgraded the Preference part to provide a more intuitive and clear representation of trading patterns, enhancing the overall visibility of the buy and sell history.

III. Community Engagement:

1. Social Media Milestone:

Our Twitter followers have reached 4,000, reflecting growing interest and engagement in our platform.

1. Onchain Derivative Data Sharing:

We've started sharing cards capturing GMX onchain derivative data snapshots (covering the period from December 3 to December 10) in the GMX community. This initiative will continue with at least one update shared weekly, keeping the community informed and engaged. And more interesting cards will be shared

IV. Partnerships and Collaborations:

1. Smart Contract Development Completion and Upcoming Announcement:

2. Our partnership with Biconomy is a key element of our copy-trading feature, which utilizes AA wallets powered by them. With the completion of the smart contract development for copy trading, we are excited to announce further details about this collaboration soon.
