Linea Contracts

All operations can be performed through theVault contract using the standard Diamond proxy style. All operations such as [Swap, Liquidity, Vote, Bribe, and Claim reward] can be performed by interacting with the vault, and N operations can be chained at once.

For more information, please refer to this section of Techdocs.

For chart integration, please refer to this part .

Contract github repository : https://github.com/velocore/velocore-contracts

We'd be more than happy to provide more detailed source files, including scripts, lenses (viewer functions), and example files for integration partners. Feel free to contact us via Telegram and Discord.
