From a discord user –

I am getting errors when testing Enigma with the examples in the medium post

i created a git repo [GitHub - Solexplorer/testing-enigma: Testing Enigma](#)

When I run discovery compile, I get this error

[

](https://cdn.discordapp.com/attachments/508759977742172161/605062634622156801/unknown.png)

Thus it doesn't create the files in .wasm

RESOLUTION

Regarding the issue, I solved it by upgrading Node to the latest version

Somehow I got node 8.0 with apt manager and it wasn't creating the directories like enigma_contracts

and secret contracts

, I debugged that and it's a bug with fs.writeSync

that happens with versions of node lower than 9
