Human Keys are keys derived from

- what you are

- what you know

- what you have

They are really useful for building seamless onboarding flows for wallets! see)https://silk.sc

We're excited to have published a detailed dive into their functioning on our eth research forum post

https://ethresear.ch/t/a-threshold-network-for-human-keys-to-solve-privacy-and-custody-issues/20276/1

Let us know what you think.
