PROPOSAL NAME:

Ape University

PROPOSAL CATEGORY:

Brand Decision

ABSTRACT:

This proposal is aimed at creating an additional structure in ApecoinDAO, whose task will be to train people in Web3 professions. This should become a full-fledged educational institution where students will gain knowledge in their chosen field and receive a diploma upon completion.

It is planned to place several AIPs; the first one (that is, this one) was created for the purpose of approval of this organization. What will the adoption of this AIP mean? The proposed structure should be led by a "Council" (board of directors, council of elders, etc. in the future the divisions can be renamed), consisting of 12 people. If this AIP is adopted, ApecoinDAO will have to hold elections for the positions of members of the "Council". After the "council" is formed, it will have the task of resolving some issues, namely:

- Election of the Chairman of the "Council"

- Selection of the director, the person who will be the executive body of the University

- Selection of members who will be entrusted with having a multi-signature wallet

- Selecting a secretary whose responsibilities will include archiving key points from all meetings

- Selecting an accountant, a person who will record all financial activities of the University

- Determination of wages for employees

ADDITIONALLY:

After the election, the director will have to begin resolving issues with developing a roadmap, determining the number of minimum required employees, as well as their activities and wages. The director will also have to hire someone to create an educational plan. After all the calculations and calculations, the director will need to contact the council with the derived data, on the basis of which the Council will determine the amount necessary to ensure the launch (this may be a phased launch) and operation of Ape University.

When everything is ready, the next AIP will be created, which will outline the roadmap, launch stages, as well as the amount of the request and the justification for this amount.

BENEFIT TO APECOIN ECOSYSTEM:

Even if we do not take into account the fact that the creation of an educational institution in which all payments will be made in APEcoins will have a positive impact on the value of the token, we can point out a number of other advantages. It is obvious that education, with the proper approach, will attract the attention of a large number of people from Web2, ApeCoin DAO will become more useful for them, and especially if ApeCoin DAO can employ the best students, then there will be even more people willing. The Apecoin ecosystem has also acquired projects around it, which, like other projects, will require skilled workers.

PLATFORMS & TECHNOLOGIES:

apeuniversity.xyz – a site with the help of which it will be possible in the future to obtain NFT for access to classes. Currently not adapted for mobile devices.

discord.gg/275HYeCv - Discord server on which the classes will take place. Currently you can access all channels, in the future access will only be provided if you have a specific NFT.

STEPS TO IMPLEMENT & TIMELINE:

The first step is the formation of the Ape University structure itself and the recruitment of members of the "council". Term 1-2 months after adoption of the AIP (if adopted)

The second step is solving the tasks assigned to selecting key roles, as well as determining the stages of launch, calculating the required amount for the launch and operation of the institution.

The third step is the creation of an AIP, which will outline the roadmap, launch stages, as well as the amount of the request and justification for this amount

The fourth step is the immediate start of the recruitment of students and the launch of training
