Really impressed with the levels of candidates we have to choose from for the apecoin council nominations. Huge thanks to each candidate for putting themselves out there.

I'm sharing an apecoin council ranking template I created in google sheets (read only). You can customize the criteria and weights you wish to apply to the criteria. To keep things simple, I have the low and highs for each criteria as 1-10, however you can change those.

There is also the url/link to each candidates twitter account and nomination page. Feel free to download and change this as you see fit.
