, digital dispute resolution

LexDAO is an unincorporated [non-profit](#) association of legal [engineers](#). Our members cooperate to bridge wet ink to firm code

for the public good by:

- crowdsourcing [submissions](#) to legislators;

- spinning out F/LOSS smart contract [projects](#); or

- delivering [thought leadership](#) on computational law and public policy.

Why?

TBD decision tree in #find-a-lawyer

Who?

Law firms place interns, courts offer clerkships. Instead, as a practice straddling law (wet ink) and smart (code) contracts, we offer exposure to real-world web3 projects culminating in a [certified](#) legal engineer.
