Web3Auth CoreKit tKey iOS SDK

The Web3AuthtKey iOS SDK is a client-side library you can use with your iOS app to authenticate users using Web3Auth. This authentication can be achieved using any social logins Web3Auth provides or a custom authentication flow. For using Web3Auth's tKey natively in iOS, Web3Auth provides a tKey iOS SDK written in Swift.

This Documentation is based on the0.0.4

SDK Version.â
