You can find the Multilingual Translation plug-in right here on the Forum!

With this plug-in, you can easily customize the language of the basic interface to your preference.

To adjust your language setting, navigate to User Profile > Summary > Preferences > Interface > Interface Language, and then select your desired language.

Once you've selected your preferred language, you'll find the Forum interface language has now been updated to reflect your choice. The posts themselves, however will remain in English until you select the "globe" icon at the bottom of each post, as shown here:
