Getting Ready

Connect to Telos EVM Mainnet

To set up your wallet, choose "Telos EVM Mainnet" from the chain selection tab in MetaMask.

If you can't find "Telos EVM Mainnet" in your wallet, import the Telos EVM RPC by following the instructions provided by the Telos Foundation.

Fund TLOS to Your Wallet

To prepare TLOS tokens, you can use centralized exchanges or a fiat on-ramp service. Refer to the guide provided by the Telos Foundation for detailed instructions.

Please remember that you need to prepare tokens for the Telos EVM Mainnet, not Telos Zero. Make sure to follow the appropriate processes for the correct network to ensure a smooth experience.
