Customizing CSS

If you would like to customize the theme, follow these steps after a successful deployment:

1. ssh in and stop the BlockScout service:sudo systemctl stop blockscout.service
2. Navigate toblockscout/apps/block_scout_web/assets/css/theme
3. .
4. Edit_poa_variables.scss
5. with appropriate theme colors.
6. Rebuild the static assets:sudo npm run-script deploy
7. (from blockscout/apps/block_scout_web/assets directory).
8. Restart the BlockScout service:sudo systemctl start blockscout.service
9.

The BlockScout application will now be running with the designated theme changes.
