title: [ARFC] Set Metis Foundation Wallet as Emission Manager for METIS Token on Aave V3 Metis Pool

author: [@MarcZeller](#) - Aave Chan Initiative

date: 2023-07-05

Summary

This ARFC proposes to set the Metis Foundation wallet as the emission manager for the METIS token on the Aave V3 Metis pool. This will enable the Metis Foundation to define and fund incentive programs for this Aave pool, promoting growth and expanding the user base of this new Aave V3 market.

Motivation

The Metis Foundation has expressed a desire to actively contribute to the growth and development of the Aave V3 Metis pool. By setting their wallet as the emission manager for the METIS token, the Foundation will be able to directly fund incentive programs that can attract more users to the pool and stimulate activity. This aligns with the broader goals of the Aave community to foster active and engaged markets.

Specification

The Metis Foundation wallet address is as follows:

Emission Admin Wallet (Metis Foundation): 0x97177cD80475f8b38945c1E77e12F0c9d50Ac84D

The AIP call setEmissionAdmin() method in the emission_manager contract.

EMISSION_MANAGER.setEmissionAdmin(METIS, EMISSION_ADMIN);

This method will set the Metis Foundation wallet as the emission admin for the METIS token.

Disclaimer

This proposal is powered by Skyward. The Aave Chan Initiative has not been paid by any third party for this proposal.

Next Steps

1. Gather feedback from the community and risk service providers.

2. If consensus is reached on this ARFC, escalate this proposal to the Snapshot stage.

3. If Snapshot outcome is YAE, escalate this proposal to AIP stage
