We built Secret Calendar (secretcalendar.org) in late 2021 as a public good for the Secret Network community (paid for out of pocket with $0 in funding). Initially, Secret Calendar was very limited in scope, but it has since grown rapidly. The Secret Network community can use Secret Calendar to keep track of ALL upcoming and ongoing airdrops, NFT mints, DeFi updates, dApp specific developments (Sienna, Shade, LedgenDAO, etc.), as well as general community initiatives in ONE LOCATION. Secret Network projects and dApps have been utilizing Secret Calendar to spread awareness for their launches and initiatives. Secret Calendar is averaging 300+ unique daily visitors. Although the initial iteration of Secret Calendar has been successful in garnering community interest and engagement around ongoing/new events initiatives, we believe that there is always room for improvements. After months of experimentation and collecting community feedback, we present to you, Secret Calendar 2.0 and we are asking for funding to continue further development:
