Mainnet Setup

This section will take you through the process of taking a node from fresh machine to full validator. The general steps are as follows:

1. [Install SGX](#)
2. [Install secretd](#)
3. [Setup Full Node](#)
4. [Quicksync / Snapshot](#)
5. or[Statesync](#)
6. the node
7. [Becoming A Validator](#)
8.

If you wish to create an archive node, replace step 3 with[Running an Archive Node](#) .
