GM Apecoin Community!

The old Working Group Zero (WG0) Discord server created through AIP-196 has changed the official Discord invite link to discord.gg/apecoindao - this is now the only way to access the Discord server (Server ID: 1059304419428139039).

Remember, safety first! Make sure to double check any invite code you use to join the Discord. If you shared previous links to the Discord server, please double check them and delete them if they were using the old vanity address.
