gm. One point made by someone in the recent Ape Assembly meeting (the first meeting, 5th July 5) was "…it becomes popularity contest…". That comment was not about AIPs but we can extend it to AIPs/ ideas.

I propose making all AIP submissions (AIP ideas, drafts, final submission etc.) anonymous.

This will ensure that ideas are discussed and debated entirely on the content and not who is actually posting them.

If approved, this would be a small change in our tech stack so the cost for this implementation would practically be 0.
