Many topics and even categories seem to be outdated;

The links from [read me](#) are outdated like these notes are last updated like 6 years ago:

[HackMD](#)

[Hello potential research collaborator! - HackMD](#)

Hello potential research collaborator! Rumour has it that *you*, a researcher or manager of resea

I actually lack to have such a well organised and up to date notes.

Is there is anything I (or community) can do about to help to keep this data up to date and maintained?

Same relates to forum categories etc - is eWASM project still active?
