Get API Key

The Enso suite of APIs is the simplest way to enable DeFi integrations, better prices, better gas execution, transaction bundling, and impeccable UX in your app. To get started, you will need to set up an account to access the Enso Dashboard(opens in a new tab) in order to generate an API key for your project.

Follow these steps to get started, in less than 5 minutes!

i For testing purposes you can use this key:1e02632d-6feb-4a75-a157-documentation

Step 1: Create an Enso Account

To create an account on the Enso Dashboard(opens in a new tab) clickContinue with Google , select your email, andclick on the email you wish to sign-up with.

Step 2: Copy API key

Copy your API key by pressingCopy API Key . If at any stage you wish to generate a new key, you can pressGenerate New Key , and your old key will be deactivated.

Step 3: Test the API Key

Once you've created your key test the route endpoint .

To find all the networks supported by Enso, use the networks endpoint .

Replace the API key in the header with your API key

curl

-X

GET \ -H

"Content-Type: application/json" \ -H

"Authorization: Bearer " \ "http://api.enso.finance/api/v1/shortcuts/route?
chainId=1&fromAddress=0x9008D19f58AAbD9eD0D60971565AA8510560ab41&tokenIn=0xc02aaa39b223fe8d0a0e5c4f27ead9083c756cc2&tokenOut=0x5c6Ee304399DBdB9C8Ef030aB642B10820Dl

Step 4: Have a question or improvement?

1. Read the docs(opens in a new tab)
2. Join our developer telegram channel(opens in a new tab)
3. Suggest doc improvements on our github(opens in a new tab)

Step 5: Start building

Check out our Examples to start building with Enso today!
