Taiko Tuesday

is a community-driven bi-weekly newsletter covering the ins and outs of Taiko, a decentralized Ethereum-equivalent validity rollup.

Let's get into it!

Testnet status

- Total transactions: 4,437,923.

- Total blocks: 1,347,876.

- Average block time: 5.9 seconds.

- Total wallet addresses: 595,380.

- Total unique provers: 3,824.

- Total unique proposers: 7,605.

More stats: https://explorer.jolnir.taiko.xyz .

Development updates

You can follow the changelogs to see what's been happening in the Taiko development department. There are two changelogs: The [Taiko client](#) and the [Taiko-mono repository](#).

Community updates

- The past few weeks were all about Devconnect. The Taiko team spent a week in Istanbul and attended over 25 events, spoke to hundreds of people, ran workshops, and did other cool stuff. Here are some recap tweets: [1](#), [2](#), [3](#), [4](#).

- While in Istanbul, we announced a new milestone in the Taiko roadmap: The Based Booster Rollup (BBR). Check out the [announcement blog post](#) that talks more about what it is and why it's special.

- Newest changelogs [released](#).

- We also [announced](#) the winners of the inaugural Taiko Community Grant Program. Congrats to the grantees!

- Mark your calendars: Taiko will have its Community Call #9

on Discord this coming Friday.

Education updates

- Text
- ZKRC #17

Community Edition has been [posted](#).

- d1onys1us gave an [interview](#) to TechNode.

- Lisa [wrote](#) an introduction to FHE.

- ZKRC #17

Community Edition has been [posted](#).

- d1onys1us gave an [interview](#) to TechNode.

- Lisa [wrote](#) an introduction to FHE.

- Audio

- We're hosting [a Twitter space on intents](#) on November 30. Join!

- We're hosting [a Twitter space on intents](#) on November 30. Join!

- Video

- d1onys1us [spoke](#) to The Rollup team in Istanbul about Based Booster Rollups.

- Daniel [spoke](#) Epic Web3 about the different types of ZK-EVMs.
