# Restake LSTs

Step 1: Open the EigenLayer App and connect your Web3 wallet. Visit holesky.eigenlayer.xyz for the most recent EigenLayer Testnet app.

Step 2: Select the token you want to restake.

Step 3: Token Approval. Enter the amount you would like to restake and clickDeposit .

If this is your first time depositing a token on EigenLayer, you'll need toApprove token spending before you can restake. Token Approval gives a dApp permission to move the specified token from your wallet. Set a spending cap, and clickNext .

Step 4: Once the token Approval transaction is confirmed, you will be prompted to confirm theDeposit transaction.

Step 5: Confirm theDeposit transaction via your wallet.

If successful, you will see the corresponding increase in your Restaked balance in the app:

Step 6: Monitor your Staking Rewards & Restaked Ratio on thehomepage . Previous Obtaining Testnet ETH & Liquid Staking Tokens (LSTs) Next Withdraw from EigenLayer
