As promised, this will be a continuously updated thread loosely tracking where the granted OP has gone. My goal is to cover all of the grants, tracking how OP flowed to likely user or team wallets, and to what ends. Among other things I'll be paying attention to distribution (e.g., how many OP paid out per user connected, share of top 5 wallets, etc) and to whether the OP was used for intended ends.

This is a really time-consuming thing that requires some double-checking, and even then I might get things wrong. So I invite people to join me on this, especially the project teams that will be referenced. I'll generally try to do outreach to those teams privately to get more clarity before posting publicly, though.
