Deployments

Contract Deployments

A full list of deployed contracts can be found in the [deployments.json](#) file. This contains deployments for all environments and is difficult to parse through manually. You should only need to reference it for automation or as a source of truth. For convenience, we extracted the important contract addresses and listed them here.

User Interfaces

Bridge UI

A bridge UI where users can transfer assets across domains. Here you can also mintTEST tokens with the faucet.

https://testnet.bridge.connext.network

Connextscan

This is the testnet scanner site where you can track the status of transfers bytransferId .
