Flashbots Transparency Dashboard

The [Flashbots Transparency Dashboard](#) is a public dashboard with metrics on Realised Extractable Value (REV) on Ethereum, as well as data related to the Flashbots MEV-Boost Relay. The dashboard includes data from the Ethereum mainnet since block #15537940 on September 15th 2022 and has a freshness delay of 1 week. Pre-merge MEV activity can be explored here: [MEV-Explore](#) .

The Transparency Dashboard is a key component of our commitment to provide transparency on the wider MEV ecosystem and our products. It serves as a valuable resource for contributors and collaborators by providing data for research. Methodology and more information can be found in the [forum post](#)) introducing the dashboard.
