We have just started a vote to be added to Lido's oracle member committee!

P2P is one of the Node Operators of Lido and developer of many of Lido's services and smart contracts. We are also one of the more prolific of Chainlink's node operators and we have integrity, experience, and capacity to operate the oracle for Lido.

Please vote for us to be added to the oracle member committee! Can't wait to see stETH being adopted more actively by the ecosystem!
