I accidentally transferred 25k DAI to this contract:

0x357D51124f59836DeD84c8a1730D72B749d8BC23.

can I do anything about this? I see that the contract is upgradeable… does anyone have the private key? If not, what happened to the private key? Can the owner of these keys transfer the amount back to me if I show proof of the transfer?
