Join The Testnet

After IRIS Hub 1.0 upgrade of mainnet,Nyancat Testnet starts to operate as a stable application testnet which has the same version as the mainnet, so that the service providers of IRISnet can develop their apps on or interact with IRIShub without running a node or lcd instance.

# #

Run a Full Node

# #

Start node from genesis

::tip You must use Irishub[v1.1.1open in new window](open in new window) to initialize your node::

init node

iris init< moniker> --chain-id= nyancat-8# download public config.toml and genesis.json curl -o ~/.iris/config/config.toml https://github.com/irisnet/testnets/blob/master/nyancat/config/config.tomlcurl -o ~/.iris/config/genesis.json https://raw.githubusercontent.com/irisnet/testnets/master/nyancat/config/genesis.json# Start the node (also running in the background, such as nohup or systemd) iris start

# #

Faucet

Welcome to get test tokens in our[testnet faucet channelopen in new window](testnet faucet channelopen in new window)

Usage: in[nyancat-faucet channelopen in new window](nyancat-faucet channelopen in new window) , type "faucet " + your address on Nyancat testnet, to get test tokens (NYAN) every 24 hours.
