SEED LATAM - Delegate Communication Thread

Following the standards of SEEDLatam and L2 en Español in governance, this is our thread with all our relevant decisions and participation in ArbitrumDAO's governance.

Presentation

SEEDLatam supports communities and leaders in Latam. We support and encourage the participation of different delegates from Latin America in DAOs with high impact, working together with different communities in the region. Meanwhile L2 en Español, is a community dedicated to to the study of Ethereum's scaling solutions, collaborating with SEEDLatam to bring this delegation forward, and contribute with our experience and knowledge about Arbitrum.

About myself @cattin, I'm a Law student born and raised in Lima, Perú. Currently, I'm working as bizdev/growth for Kali(DAO deployer + legal wrappers) and Nation3 (onchain jurisdiction), but I also contribute to LexDAO and Layer 2 en Español. Beyond this, I've been an enthusiast of Arbitrum since day one and I have always done by best to spread information about it in our L2 en Español community.

Read our complete presentation in the Delegate Statement Template thread here.

There's a Spanish version that you can read here.

Our procedure

With the help of numerous collaborators and members of SEEDLatam and L2 en Español, every decision made on behalf of our communities regarding governance is discussed, agreed upon, and communicated to all those interested in participating through our discussion channels on Discord.

No decision will be made unilaterally

SEED Latam & L2 en Español>Gobernanza>ArbitrumDAO

Participation in forum discussion threads and daily activities represent the personal opinions of the delegate and collaborators in their efforts to stay up to date with their roles and commitment to governance; the use of "we" will be applied when representing decisions or communications that arise from the community, such as voting decisions and proposal

submissions, all through this profile.

This is a repost of our Delegate Communication Thread because the original was taken down without any explication a couple of weeks ago

Special thanks to PEPO, Cryptochica, our contributors @axlvaz_SEEDLATAM.eth, @Noa, @Manugotsu_SEEDLatam, @MCamere, @SEED_Latam_Joxes, @Phenrril and all of our community
