Summary

A proposal to increase the supply cap for RPL on Aave V3 Ethereum.

Motivation

The supply cap for RPL on V3 Ethereum is currently at 100% utilization.

As RPL is listed as a non collateral asset, we recommend doubling the current supply cap. Given the current borrow cap utilization, we do not recommend increasing it at this time.

Next Steps

Once we receive feedback from [@Gauntlet](#) on the above recommendations, we will be able to move forward to implement these updates via the Risk Steward process.
