In Season 3, there will be a Grants Council with a Growth Experiment Grants Sub-committee.

- Growth Experiments Sub-Committee:

- Focus: maximize the number of users interacting with applications on Optimism

- Non-focus: retroactive airdrops

- Possible RFPs: small-scale liquidity mining experiments, usage incentives, user education

- Format: proposers receive milestone-based grants, suggested to be <250k OP, to pass on directly to their users as incentives for engaging with a protocol, platform, product or service. 40% of the grant will be distributed to the proposer upfront and the remaining 60% will be distributed upon completion of a mid-way point milestone. Completion of all milestones should be achievable in 3-6 months.

- Budget: 4M OP / Season

- Reviewers: 5 (see below)

- Consensus: 3/5 vote required to fund a grant

- Focus: maximize the number of users interacting with applications on Optimism

Please leave your suggestions for the types of grant proposals you'd like to see submitted to the Growth Experiments sub-committee in Season 3 and/or any suggested proposal guidelines for these types of grants .

The Council should use this as an input into any Requests for Grants and/or guidelines they put forward in Season 3.
