Palm

The [Palm Network](#) is an Ethereum Virtual Machine-compatible Polygon Supernet. The Palm network is for creators, fans, and leaders in various industries such as art, technology, sports, and entertainment. The network provides support to developers in their quest to build new and user-friendly tools that contributes to the growth of the Web3 ecosystem.

See also The [official Palm documentation](#) for more information about using the Palm network. [## Quickstart Learn how to quickly connect and make calls to the Palm network. ## JSON-RPC APIs View the APIs available for communicating with the Palm network. ## Create an API key Learn how to create an API key and secure and share it with your team.](#)
