After careful consideration and analysis, we have calculated the reimbursement amount to be 8.3183 ETH, based on data from Rated compiled by the Lido team, and other calculations that ranged from 7.3757 ETH (our internal calculation) to 9.7154 ETH (Lido team calculation using max-bid for EL rewards). We have decided to take the median value of 8.3183 ETH as the reimbursement amount.

We sent the 8.3183 ETH to the Lido Execution Layer Rewards Vault 0x388C818CA8B9251b393131C08a736A67ccB19297
