Deployment

Blockscout deployment options

There are several methods available for deploying Blockscout and associated services (stats, admin etc).

- [Manual Deployment](#)
- : Includes instructions for deploying Blockscout with the current frontend and all microservices.
- [Docker-compose Deployment](#)
- : Includes current frontend and all microservices
- [Kubernetes Deployment](#)
- : Includes current frontend and all microservices
- [Manual Deployment](#)
- with backend andold Blockscout UI (no longer supported)
- [Frontend migration](#)
- (migrating from the previous Blockscout UI to the new UI)
- [Terraform Deployment](#)
- (Polygon Supernets)
- [Ansible Deployment](#)
- (old UI)
