System Status

Summary

To access system status information, retrieve the ETH CDP Service through Maker.service('cdp').

```
Copy constservice=maker.service('cdp');
```

getSystemCollateralization

- Params:
- none
- Returns:
- promise (resolves to system collateralization ratio)
-

getSystemCollateralization() returns the collateralization ratio for the entire system, e.g. 2.75

```
Copy constsystemRatio=awaitservice.getSystemCollateralization();
```

getTargetPrice

- Params:
- none
- Returns:
- promise (resolves to target price)
-

getTargetPrice() returns the target price of Sai in USD, that is, the value to which Sai is soft-pegged, which historically has been 1. It returns aUSD_SAI [price unit](#) .

```
Copy consttargetPrice=awaitservice.getTargetPrice();
```
