Deep Linking

How to deep link to the Relay App

The following query parameters are supported:

Parameter Description Example fromChainId The chainId of the from chain 8453 toAddress A valid address to receive the bridge 0xd8da6bf26964af9d7eed9e03e53415d37aa96045 amount The amount to have the input initially set to 0.1 currency The currency to have preselected eth orusdc lockToChain Disable selecting a toChain true lockCurrency Disable selecting a currency true To deep link to a specifictoChain , you must replace the slug after/bridge with the desired chain's name, like so:relay.link/bridge/{chainName} . Spaces should be replaced with dashes. You can check out the list of supported chains[here](#) .

Examples

Bridge from Zora to Base

https://relay.link/bridge/base?fromChainId=7777777

Bridge from Ethereum to Optimism with a preset address

https://relay.link/bridge/optimism?fromChainId=1&toAddress=0xd8da6bf26964af9d7eed9e03e53415d37aa96045

Bridge 0.01 ETH from Optimism to Zora

https://relay.link/bridge/zora?fromChainId=10&amount=0.01

Bridge from Ethereum to Base with the currency and toChain locked

https://relay.link/bridge/base?fromChainId=1&lockCurrency=true&lockToChain=true

Bridge 100 USDC from Base to Arbitrum

https://relay.link/bridge/arbitrum?fromChainId=8453&currency=usdc&amount=100 Just-In-Time Gas Relay Protocol twitter Powered by Mintlify
