Template Repositories

If you're looking for the fastest way to bootstrap an app using World ID, we have multiple template repositories available for you to use. To integrate World ID into an existing app, proceed to [Installation](#) .

World ID Cloud Template

[Use this Template](#)

This template repository is a simple example of how to use World ID and our Developer Portal API. Once you've created a new repository from this template, set your app_id and action in the .env file and run the following command to get started:

Usage

pnpm i

&& pnpm dev Copy Copied!

Sign In with World ID Template

[Use this Template](#)

This template repository is a simple example of how to use Sign In with World ID using [NextAuth](#) . Once you've created a new repository from this template, set your NEXTAUTH_URL , WLD_CLIENT_ID and WLD_CLIENT_SECRET in the .env file and run the following command to get started:

Usage

pnpm i

&& pnpm dev Copy Copied!

World ID On-Chain Template

[Use this Template](#)

This template repository is a simple example of how to use World ID in an on-chain application.

Developers should be familiar with [Foundry](#) to use this template.
