SecretPy (Python)

The Secret Software Development Kit (SDK) in Python is a simple library toolkit for building software that can interact with the Secret blockchain and provides simple abstractions over core data structures, serialization, key management, and API request generation.

Features

- Written in Python offering extensive support libraries
- Versatile support for key management solutions
- Exposes the Secret Rest API through LCD/REST client
-

See the full documentation, code and usage examples herehttps://github.com/secretanalytics/secret-sdk-python
