This proposal is intended to signal a change of the accepted gas fees by Secret validators.

simultaneously it can be seen as a signalling proposal to change the not yet implemented min-mingas fee parameter to 0.05uSCRT.

Please follow past conversation about this topic here:[Proposal for Implementing an on-chain Minimum Gas Fee of 0.1 uscrt - #11 by antonymous](#)

Proposed fee tiers:

Low: 0.05 uSCRT

Med: 0.1 uSCRT (2x lower option)

high: 0.25 uSCRT (2.5x lower option)

**please see this as a potential last interim change before Secret moves to SDK v0.47+ and can thereby use ABCI++ and the Skip block SDK to make fees usage/demand dependent.

Best,

Ertemann
