Friends, do you know, that you can easily send SCRT in Telegram or Twitter?

In Twitter you need to comment any twitt and write:

@username

scrt #sputnik

For example:

@ponimajushij

1.234scrt #sputnik

It means, that you will send to user of Twitter @ponimajushij

(it's me) 1.234 SCRT

It will automaticly sent from your balance.

To deposit somthing on your balance just login to https://sputnik.exchange/ with your Twitter account.

And there you will see all your funds, and how to deposit and withdraw.

Also, you can combine your Twitter and Telegram accounts, and have one balance for both accounts.

Because in Telegram you can start bot t.me/SputnikNetworkBot and send tips with 3 clicks to any other user in telegram, who is starting bot too.

Sputnik supports Secret Network!
