Hi,

I am trying to launch Enigma Docker Network by running ./launch_network.bash , but I came up with the following error.

I tried to reinstall rust by following

How to Install Rust Language on Ubuntu 16.04 Xenial Xerus

In this tutorial we'll learn how-to install Rust language on Ubuntu 16.04 Xenial Xerus. We will install Xenial from Ubuntu repository and from Rust website.

but still shows the same error.

Could someone help me for this problem?
