Update on the results of the RetroPGF 3 voting badge distribution.

You can find the original post on the Round 3 Voting badge distribution process [here](#)

Overview

There are a total of 146 badgeholders in RetroPGF 3.

76 of which were newly introduced via the [voting badge distribution process](#).

1. 42 badgeholders were selected by badgeholders who voted in Round 2

2. 24 badgeholders were selected by the top 50 recipients of Round 2

3. 7 badgeholders were selected by the Optimism Foundation

4. 4 badgeholders were selected by the badgeholders selected by the Optimism Foundation (see 3.)

Badgeholder Attestations

All voting badges are recorded as attestations via the Ethereum Attestation Service:

- You can find the badgeholder attestation schema [here](#)

- The attestations were issued from the address [0x621477dBA416E12df7FF0d48E14c4D20DC85D7D9](#)

- Each attestation includes a "refferedMethod" and "Referred By" field, allowing for the traceability of how the badgeholder was selected to participate.

You can view all badgeholder profiles on [vote.optimism.io](#)

The future of Citizenship Selection

Ownership over citizenship distribution will eventually be the responsibility of [Optimism's two-house governance system](#) and will be issued based on the [reputation](#) that Optimism Collective members have earned. We invite badgeholders and community members to discuss what reputation-attributes (in the form of [attestations](#)) could be valuable for future Citizenship selection in [this thread
