I noticed that my staking rewards are always around 20% less than what I would expect to receive.

Is it because the block time on mainnet (>6 seconds) is higher than the expected block time (5 seconds)?

Through a proposal, Cosmos Network adjusted the parameter "blocks_per_year" so that the reward rate align with the theoretical reward rate:

Cosmos Forum – 15 Mar 19

[GOVERNANCE] Adjustment of blocks_per_year to come aligned with actual block...

This documentation explains the detail content of a governance proposal on Cosmos Network Topic : Adjustment of blocks_per_year to come aligned with actual block time Proposer : B-Harvest(cosmosvaloper10e4vsut6suau8tk9m6dnrm0slgd6npe3jx5xpv) ...
