Rate Limits

In order to protect our services from abuse we have rate limits on the number of requests that can be made. Currently, the rate limits are set as follows.

relay.flashbots.net

- Bundles

Method Limit eth_sendBundle 1800 / IP / 1 min mev_sendBundle 1800 / IP / 1 min eth_cancelBundle 600 / IP / 1 min mev_simBundle 300 / IP / 1 min eth_callBundle 300 / IP / 1 min All others 120 / IP / 1 min Note that this is requests and not transactions submitted per second. There is no limitation on the number of transactions in a request.

RPC rate limits for retail user transactions sent to rpc.flashbots.net [can be found here](#) .

Rate limit exceptions

If you require a higher rate limit please reach out to [Shea Ketsdever](#) . [Edit this page](#) Last updated on Jan 14, 2025 [Previous Debugging](#) [Next Introduction](#)
