Highlights

We have just released the biggest upgrade to Numerai's dataset ever. The new dataset has 4x the number of rows, more than 3x the number of features, and 20 optional targets. The fastest way to get started with the new dataset is to run through the [new example scripts](#)

You can continue to use the old dataset in the same way but models on the new dataset have much higher scores in historical tests. The website's "Download Data" button will only download new data. The legacy data can s…

The new data sets contain different eras than before. Numerai publish example predictions parquet files (not csv) for the updated example model on the new data sets.
