Getting User and Pair Data

The SDK simplifies getting data related to token pairs and strategies. This includes viewing strategy details, seeing what pairs are currently active, and checking if a pair has liquidity.

To Get User or Pair Data

1. Initialize the SDK with the [Constructor](#)
2. .
3. Sync strategy data by calling [startDataSync](#)
4. .
5. Call the desired data gathering function:
6.
   - [pairs](#)
7.
   - [hasLiquidityByPair](#)
8.
   - [getLiquidityByPair](#)
9.
   - [getUserStrategies](#)
10. *
11.
