Objective

Collaborate with others to turn ideas into proposals - share thoughts with a focus on solutions and compounding ideas into plans

This is a place for discussion and idea building. Bring ideas for improvement, cooperate together for the betterment of the community. Please keep this a clean process with an emphasis on solutions and planning realistic advancements and enhancements to the ecosystem. Do not duplicate posts and ideas, as this is not helpful. Read through other's ideas before posting. If your idea or something similar is already being talked about, collaborate and share your thoughts.
